

ABSTRACT OF THE DISCLOSURE

1 Improved electronic gaming apparatus, including a cabinet for housing video and sound
2 generating electronics, coin-handling and pay-out mechanism and a video display screen. The
3 display screen is substantially taller than it is wide and preferably has a touch screen associated
4 therewith. Although the displayed video presentation may take any form, the preferred slot
5 machine display embodiment includes graphics replicating the standard play board at top, game
6 board in middle, and principal user input interface below.
